

JOY KUMBHAKAR

FRONTEND & ANDROID DEVELOPER | UI/UX DESIGNER

PROFILE

Innovative Frontend & Android Developer and UI/UX Designer with over 3+ years of freelance experience. I specialize in building secure, military-grade Android applications and responsive web platforms. My expertise spans Java, Kotlin, Python, and modern web technologies. I am passionate about solving complex technical challenges and delivering clean, user-centric designs that prioritize data security and performance.

PROJECTS & EXPERIENCE

- Freelance Developer & Designer** 2021 - Present

Full-stack development and UI/UX design for diverse global clients.

 - Delivered 3+ years of high-quality freelance work in frontend development and Android app creation.
 - Designed intuitive UI/UX for mobile and web applications, ensuring high user retention.
 - Collaborated with clients to translate business requirements into technical solutions.
- Secure Thing Android App** [securethings.netlify.app](#)

A high-security vault application designed for military-grade privacy and data protection.

 - Engineered a robust privacy vault application focusing on data integrity and user anonymity.
 - Implemented military-grade encryption standards (AES) to protect sensitive files, photos, and videos.
 - Designed a clean, intuitive User Interface (UI) ensuring seamless file management across various Android devices.
 - Developed and maintained a companion website for app distribution, updates, and user documentation.
- Personal Developer Portfolio** [joykumbhakar.netlify.app](#)

A professional, responsive personal website showcasing technical projects and skills.

 - Designed and deployed a fully responsive website using semantic HTML5 and modern CSS3.
 - Implemented advanced JavaScript logic for interactive elements and smooth user navigation.
 - Optimized website performance and SEO to ensure high visibility and fast load times across mobile and desktop platforms.
 - Integrated contact forms and backend logic for seamless communication.
